Heart Attack Website

JANUARY 1

Team ID: 15
Authored by: Fares El Gohary and Omar El Hennawy

Introduction and Objectives

- Our website is for the fast-food chain: Heart Attack.
- It has 6 pages: Home, Menu, Offers, Location, Feedback, and Login/Signup.
- Home brings you to a basic page that contains the restaurant's logo and buttons to quickly login or view the menu.
- Menu brings you the current selection of food you can order.
- Offers get you all the current deals and sales.
- Locations gives you a quick glance at all the restaurant's branches, their respective numbers, and addresses.
- Feedback gives you a small page where you can type in your name, number, and write any feedback you have about the restaurant.
- Login gives you a quick little menu to type in your info, and if haven't yet created an account there's a clickable link below that redirects you to the sign-up page.
- Sign-up and Feedback pages have their own database.

File Structure

2 main folders: Models and Public.

Inside Models: js.db

Inside Public: A folder with CSS, a JS folder, all the HTMLs, js , and CSS that we use.

Function and Nonfunction

Functional the user will:
